Recalcitrant list 3-12-2012 Enclosure C.pdf

recalcitrant letter to VLS.pdf

Randy, per our discussion last week, even though some entities were named on the recalcitrant list, they did not receive letters because they had already signed the AOC. A note to this effect was included in the envelope. Those entities are: Pilot Industries, Valero, Vopak, and Goodrich.

In addition to those listed, recalcitrant letters also went to: Channel Shipyards, and Enterprise Product Partners (TEPPO).

I also sent General Notice letters last week to the following who were originally on our Class I generator list:

Allchem
Powell Industries
Baker Petrolite
Dana Containers

We have not received any AOCs since the most recent mailing. In other words, I believe the list of AOCs I sent to you on March 8 is still all that EPA has received.

Also attached please find my Waste in List which I recently received from my contractor. I have not had much time to study this document yet.
